2. Introduction

2.1 Interactive Services Website User Manual Overview

The AMMIS has several functional areas that perform specific operations for the Alabama Medicaid users. This user manual is designed to cover the information necessary to perform the tasks associated with the Interactive Services website.

This manual covers the following:

- Interactive Services Website Overview
- Interactive Services Website System Navigation
- System Wide Common Terminology and Layouts
- Interactive Services Website Pages/Panels
- Help

2.2 Interactive Services Website User Manual Objective

The purpose of the AMMIS Interactive Services Website User Manual is to provide Alabama Medicaid users with detailed descriptions of the online system, including pages/panels field descriptions, pages/panels functionality descriptions and graphical representations of pages/panels.

3. Interactive Services Website Overview

3.1 Introduction to the Interactive Services Website

The Interactive Services website allows providers to verify Alabama Medicaid recipient eligibility, claim status, and to upload and download claim files.

The website has been developed by HP Enterprise Services (HPES) and is offered at no cost to Alabama Medicaid providers. This site is available 24-hours a day, seven days a week, excluding time for scheduled maintenance. Through the use of online user friendly forms, a provider is able to inquire on recipient eligibility, claim status, prior authorization requests and household inquiries. A provider is also able to enter and submit claims, including online voids and adjustments and prior authorization requests.

3.2 Audience

The information described in this document is designed for use by recipients, providers, clerks, and billing agents participating in the Alabama Medicaid program.

3.3 Purpose

This document provides the user with the necessary steps to log on to the website, navigate the website, verify eligibility and claims status, upload and download files, seek assistance for technical issues, and logoff the website.

3.4 Applications

The Interactive Services website provides the user with a choice of applications. The primary application is the Eligibility Verification application where Alabama Medicaid recipient eligibility can be verified. A second application is the Claim Status Inquiry. Using this application allows providers to check on the status of adjudicated claims. The third application available is the uploading and downloading of batch files.

3.5 Supporting Documentation

Readers of this document may find it useful to consult the *Alabama Medicaid Provider Manual* to completely understand the policy behind the billing procedures of the Alabama Medicaid program. To receive a CD-ROM containing the *Alabama Medicaid Provider Manual*, contact HPES Provider Assistance Center at 1 (800) 688-7989 or download a copy of the manual from the Alabama Medicaid homepage at <http://www.medicaid.alabama.gov/>.

3.6 Content Changes

Readers of this document should note that this is a living document and is subject to change at any time based on functionality changes within the website.

4. Interactive Services Website Navigation

4.1 Web Browser Setup

Workstations must be minimally equipped with Internet Explorer (IE) version 6.0, and is also compatible with IE7, and IE8.

Please refer to the websites for Internet Explorer (www.microsoft.com) for additional information on downloading the versions available.

NOTE:

Please refer to the browser installation information to find out the appropriate personal computer recommendations and configurations. The AOL browser does not work well with this Web application.

4.1.1 Navigation Buttons

Do not select the previous/back or following/forward website navigation buttons in the toolbar if the website navigation button offers a selection for “next” or “previous” screen. If you use the navigation or windows buttons instead of those provided by the application, you may risk losing work in progress.

4.1.2 Screen Display Features

The AMMIS is designed to display within Web browser pages that fit on a computer (PC) desktop with a minimum screen resolution of 1024 x 768 pixels and preferred screen resolution of 1400 X 1050 pixels. However, in order to fit large system objects such as panels and pages into one screen print, the user has the option of resetting the text size of the Web browser so that the selected area of the system fits into a screen print.

In addition, there may be some Web browser pages that use a lower pixel configuration and cause a horizontal scroll bar to appear at the bottom of the page for viewing the left side and the right side of the information displayed. In general, pages should only require vertical scrolling.

4.1.3 To Set System Text Size

To set system text size, perform the following steps:

Step	Action	Response
1	Log into the Interactive Service website.	Home page displays.
2	Select View from browser toolbar.	View menu displays.
3	Point to Text Size and click Smaller .	Default text size is set to medium. After the user selects smaller, the system objects will appear smaller.

4.2 Web Address

The address to access the Interactive Services website is:

<https://www.medicaid.alabamaservices.org/ALPortal>

4.3 Users

4.3.1 User Roles

Interactive Services website users fall into one of four distinct and secure user roles:

- Guests
- Providers
- Clerks
- Trading Partners

The following table describes what features each user can access in the Interactive Services website based on user role:

4.3.2 User IDs and Passwords

Providers who use the Interactive Services website must have a valid user ID and password to access the system. Billing provider IDs, with an active contract, will be issued a Personal Identification Number (PIN) in the form of a letter. Refer to section 9.1 *Account Setup* for instructions related to setting up a provider account based on the information received in the Provider PIN letter. An active provider account will be able to access the interactive features noted in the above section, 3.4.1 *User Roles*.

Along with the Provider Electronic Solutions software, providers should receive a letter from HPES issuing a web Personal Identification Number (PIN) which permits a user to create a Trading Partner user ID and password on the Interactive Services website. A Trading Partner web user ID will be restricted to the upload and download features as noted in the above section, 3.4.1 *User Roles*. If a Trading Partner PIN letter has not been received, contact the Electronic Media Claims (EMC) Helpdesk at 1 (800) 456-1242, to request a copy. This form is also readily available on the Interactive Services web site mentioned in section 3.3, by navigating to Information then AL Links.

- Providers that use the Provider Electronic Solutions Software or vendor-based software to submit claims to Alabama Medicaid will be required to request a new Trading Partner ID. Once the ID has been issued, refer to section 9.1 *Account Setup* for instructions related to setting up a Trading Partner account based on the information received in the Trading Partner PIN letter. To request a new Trading Partner ID, navigate to the Information then AL Links page on the new Interactive Services web site, mentioned in section 3.3, where this form resides. Otherwise contact the Electronic Media Claims (EMC) Helpdesk at 1 (800) 456-1242, to request a copy.

NOTE:

To update the Provider Electronic Solutions software with the new user ID and password, click on Tools > Options within the Provider Electronic Solutions software. Select the Batch Tab. Enter the Login ID, from the letter, into the Trading Partner ID field, then enter the new Trading Partner web user ID and password in the corresponding fields displayed based on the User Name and Password created on the Account Setup page.

4.3.2.1 Resetting Passwords

When users initially log in to the website, an option displays allowing a user to set up two security questions and answers that can be used to create a new password in the event the password is forgotten.

4.4 Application Lists

The following features are available through the website:

This option...	Does this...
Home	Displays the Home page and allows users to access the Site Settings panel.
Information	Displays the Information page and allows users to access the Software and Documentation via Hyperlinks as well as Contact information.
Account	Displays the Account page and allows users to set up or maintain account information, such as passwords and messages. Users can access the secure site from this location, as well as logoff the Interactive Services website.
Claims	Displays the Claims page and allows users to search for or submit dental, institutional, professional, crossover, pharmacy or compound drug claims.
Eligibility	Displays the Eligibility page and allows users to verify eligibility or conduct a HouseHold inquiry.
Trade Files	Displays the Trade Files page and allows users to download or upload Health Insurance Portability and Accountability Act (HIPAA) compliant files.
Prior Authorization	Displays the Prior Authorization page and allows users to search for or submit prior authorization requests.
Providers	Displays the Providers page.

4.5 Login Page Rules

The rules for the Login page are listed below:

- After six invalid password attempts in succession the user's status is changed to a "locked" status. After 10 minutes, the user's account is automatically unlocked, after which the user may again attempt six invalid password attempts in succession before the account is once again "locked". If the user is unable to recall their web password and security answers, they must call the EMC Helpdesk at 1(800) 456-1242 and identify themselves through a security process. The EMC Helpdesk associate resets the user's account by issuing a new PIN, which is sent to the caller's address by mail. Once the new PIN is received, the caller is required to once again setup their account.
- All users will be required to change their password every 30 days. The system prompts the user to change their password.

- After a user changes the password, there is no restriction to the number of times the password can be changed during the 30-day forced change.
- When the web session becomes inactive for an amount of time, the web session “times out” and all unsaved information is destroyed. A message appears requiring the user to “log on” again, creating a new session.

4.6 Connecting Through an Internet Service Provider (ISP)

Users must successfully log in to the Interactive Services website in order to utilize the services available within the secure portal.

Follow the steps below to log in to the website using an Internet Service Provider:

Step	Action	Response
1	Click Internet Explorer located on your workstation.	Internet Explorer launches.
2	Enter https://www.medicaid.alabamaservices.org/ALPortal ; press Enter key on your keyboard.	Home page of the Interactive Services website displays.

Connecting through Remote Access Server (RAS) is an option created by the Provider Electronic Solutions Software. Remote access is the ability to obtain access to a computer or a network from a remote distance. This section provides steps to log in to the Web Server through RAS when an Internet Service Provider (ISP) is not available.

This method requires users to be minimally equipped with Internet Explorer version 6.0 and a dial-up modem. If your system does not currently support these options please contact your computer administrator to have it set up on your computer.

NOTE:

Before beginning this process, you should have followed the instructions outlined in section 2.5.2 Web Tab of the *Provider Electronic Solutions Manual*. 5. System Wide Common Terminology and Layouts

The following section identifies common system terminology and features, and an associated screen capture or design layout where applicable. This is not an all-inclusive list of common system terms and layouts; however, it is a basic foundation for the novice user to view and understand prior to navigating the system. These terms are used by technical team members, training specialists, and help desk staff when discussing or, more importantly, documenting aspects of the system.

Below is a partial list of common terms described within this document:

- Page
- Page Header
- Main Menu
- Sub Menu
- Search Panel
- Data List Panel
- Mini Search Panel
- Pop Up Search Panel
- Panel

5.1 Page Layout

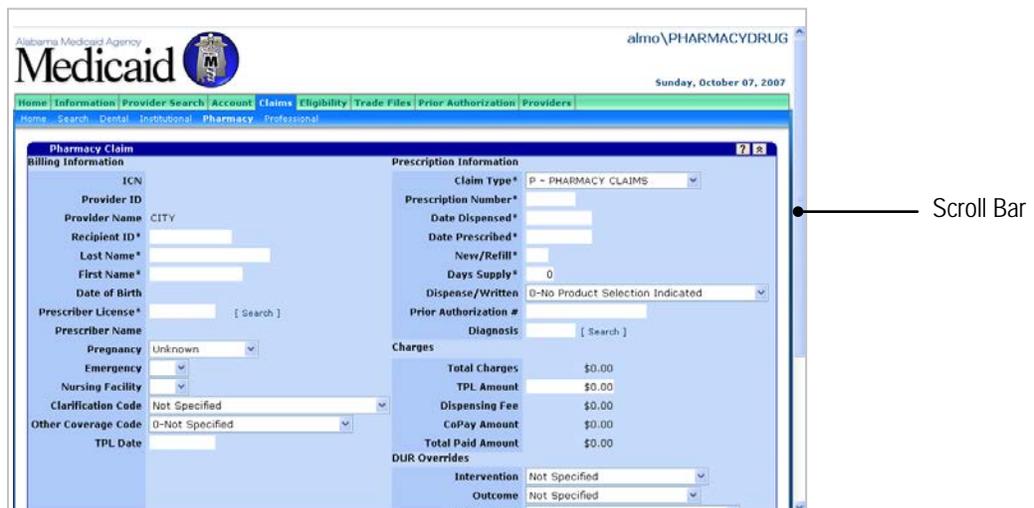

A page is defined as the entire screen that appears in the Web browser. The page contains a page header area with the day and date displayed a Main Menu bar, a Sub Menu bar, and any associated panels.

The Main Menu bar contains a horizontal set of links which display pull-down menus. Each pull down menu opens an associated page within the system.

Beneath the Main Menu bar is the Sub Menu bar of horizontal links that open an associated page within the system. The Sub Menu bar appears in the same order as the Main Menu pull down options, and the Sub Menu links are spelled the same as the Main Menu pull down options.

In general, when navigating a page, the vertical scroll bar is the only scroll bar needed to view panels stacked in a vertical manner.

If a user attempts to add, update, or delete information within the page, then tries to navigate away from the page without saving or cancelling the changes, the system prompts the user with a pop-up window message. When the system generates the message, the detail panels are locked open and navigation away from the page is not permitted until changes are either correctly saved or cancelled.

5.2 Search Options

There are several search options available within the AMMIS Interactive Services website, including search panels, data list panels, mini search panels and pop up search panels.

5.2.1 Search Panels

Search panels let users enter any combination of search criteria. Clicking **search** displays subsequent search results (if any) in the corresponding search results panel.

5.2.2 Data List Panels

Data List can be sorted in ascending  or descending  order by clicking the column name in the panel which contains multiple rows. All rows are resorted, not just the rows displayed on the current page.

In some cases, if the user clicks once on a row, the associated information displays in the corresponding panel on the same page. In other cases for search related panels, the associated information displays in a corresponding panel on another page. In the following figure, the user clicks the first row of the Detail panel and detailed information displays at the bottom of the panel.

5.2.3 Mini Search

After the user has viewed at least one search result in an information panel, another search can be completed by using the primary search fields within the Mini Search panel located above the information panel containing the search results.

Mini Search panels contain one or two primary search fields related to the business process.

Next search by: Name Description

5.2.4 Pop Up Search

A Pop Up Search allows the user to search for field data without leaving the page. By clicking on the [Search] link, the user accesses the search panel that is associated with that particular field.

After entering search criteria in the pop-up panel, simply select the desired result returned and the main panel is populated with the corresponding data.

All of the Pop Up Search panels are described in detail in Chapter 14.

5.3 Panel Layout

A panel is defined as a portion of a page that performs a well-defined unit of functionality. Some panels always appear on a page, while others only appear when invoked by the user.

5.3.1 Panel Type and Functions

The system contains various panel types with specific functions for each panel type. Some panels have common icons while other panels have icons specific to their functions. Listed below are icons that can be found on one or more types of panels:

Name	Icon	Description
Add Button		Inserts a new data record.
Cancel Button		Cancels all changes applied to all panels on the page.
Clear Button		Clears all data applied to a panel.
Close	[Close]	Closes a pop up search panel.
Delete Button		Deletes a selected data record.
Help Button		Opens a window that displays the panel help page.
Maximize Button		Expands a panel to display all of its content.
Minimize Button		Collapses a panel.
Next Button		Progresses from one panel to the next.
Previous Button		Progresses from one panel to the previous.
Save Button		Saves all changes to all panels on the page.
Search	[Search]	Performs search based on criteria entered and displays search results within the pop up search panel. Selecting the desired result returned populates the main panel with the corresponding data.
Search Button		Performs search based on criteria entered and displays subsequent search results (if any) in the corresponding search results panel.
Submit		Submits a new or updated data record.

Provider Electronic Solution

PLEASE REVIEW PRIOR TO SELECTING AN OPTION FOR SOFTWARE DOWNLOAD

PES version 3.0 must be in place before March 31st to submit 5010 and NCPDP 1.2 transactions.

Users have two options: **1)** An upgrade from PES version 2.16 to PES version 3.0 (desired), or **2)** A full install of PES version 3.0.

1) Upgrade information:

Prior to upgrading to PES version 3.0:

- Users must be using PES version 2.16
- If not, you must upgrade to PES version 2.16 or do a full install
- Users must submit all "R" status transactions (these cannot be submitted once version 3.0 is in place).

Once PES version 3.0 upgrade has completed list information will remain unchanged, but users will not be able to change, copy, resubmit, or restore archived transactions that were entered in PES version 2.16 of the Provider Electronic Solutions Software.

All transactions converted from PES version 2.16 to version 3.0 will be flagged with a new status based on the status the transaction was in at the time of the upgrade. No further action can be taken on X12 4010 or NCPDP 1.1 transactions.

The following new status codes will be used:

U – All transactions previously in an 'I' status at the time the upgrade is performed will have the status changed to 'U'. U = 4010 Unfinished/Incomplete
 B – All transactions previously in an 'A' status at the time the upgrade is performed will have the status changed to 'B'. B = 4010 Backup record/Archive
 C – All transactions previously in an 'R' status at the time the upgrade is performed will have the status changed to 'C'. C = 4010 Completed not yet Submitted/Ready
 S – All transactions previously in an 'F' status at the time the upgrade is performed will have the status changed to 'S'. S = 4010 Successfully Submitted/Finalized

2) Full Install information:

Prior to full installation to PES version 3.0:

- Users may be new to PES or using any previous version of PES
- Current PES users:
 - Lists will not be retained. It is recommended that users print their lists prior to installation so that their lists can be manually created in PES version 3.0.
- Users must submit all "R" status transactions (these cannot be submitted once version 3.0 is in place).

11.3.5 Clerk Maintenance Panel Extra Features

The Clerk Maintenance panel is visible and the Contact Name, Phone and E-mail are read-only for an existing clerk (a clerk was selected in the clerks list).

When the "add clerk" button is clicked, the Contact Name, Phone and E-mail, password is editable.

When Add New Clerk is clicked, if an existing clerk, search for current clerk by username, select current clerk, and add the necessary roles and click submit. If not an existing clerk, enter the new clerk's contact name, phone, e-mail and roles and click the submit button.

Roles may be edited on existing clerks by selecting the clerk in the Clerk data list and modifying the roles for the clerk.

The provider verbally communicates or emails password to distribute to clerk (password is set as expired so when clerk logs in they are required to change their password).

When a clerk is selected in the list, the corresponding information of that selected clerk is displayed in the clerk panel as read-only and the fields Confirm Email, Password and Confirm Password are not visible.

The users are allowed to assign/revoke roles.

11.6 Switch Provider

11.6.1 Switch Provider Panel Narrative

The Switch Provider panel allows clerks to switch to different authorized provider account profiles and locations. The user has the capability to select from a list of authorized providers. A default user indicator can be set so the provider account is set automatically when the user logs on.

After logging in the clerk can switch providers by selecting which provider to represent. Clerks will switch providers by selecting a row in a list of available providers and clicking 'switch to'. Confirmation of the current National Provider Identifier (NPI) number will appear as a page title. After selection, the clerk will be redirected to the Account Home page.

To associate a clerk to a billing NPI number, please refer to Section 9.3 *Clerk Maintenance*.

Navigation Path: [Account] – [Switch Provider]

11.6.2 Switch Provider Panel Layout

11.7 Logoff

11.7.1 Logoff Panel Narrative

The Logoff panel displays when a user's session has expired. The only functionality of this window is a button that allows the user to return to the Login panel.

A session expires after 20 minutes since the last request was sent to the web server. A request is sent to the web server when the user causes the screen to refresh, such as by clicking a button or navigating between menu items. Simply entering data into a field does not send a request to the web server and thereby does not cause the 20 minute setting to reset.

12. Claims

Claims features allow users to search for or submit dental, institutional, professional, crossover, pharmacy or compound drug claims via the Interactive Services website.

From the Claims link in the Main Menu toolbar, users can access the following Sub Menu options:

- Search
- Dental
- Institutional
- Pharmacy
- Professional

NOTE:

Medicare/Medicaid (crossover) claims will be entered within the respective claims types of Institutional and/or Professional.

12.4 Dental

12.4.1 Dental Claim Panel Narrative

The Dental panel allows a dental provider to submit a claim and/or adjust or void a paid claim. The user has the capability to enter all of the required information to submit a dental claim, including multiple detail lines. For a paid claim, the user has the option of updating select fields and re-submitting the claim as an adjustment or to void the claim.

The Dental Claim panel includes the following sections:

- Dental Claim
- Third Party Liability (TPL)
- Detail
- Surfaces
- Claim Status Information
- Adjustment Information
- Explanation of Benefit (EOB) Information

NOTE:

The Adjustment Information and EOB Information panels appear after a claim has been submitted.

Navigation Path: [Claim] - [Dental] OR [Claim]-[click on Dental link] OR [Claim] - [Search] - [search for dental claims]-[select dental claim from search results]

NOTE:

Each field which contains an asterisk represents a required field. Therefore, the claim is not considered complete until those fields have been completed with the appropriate data.

12.5 Institutional

12.5.1 Institutional Claim Panel Narrative

The Institutional panel allows an institutional provider to submit an inpatient, outpatient, long term care (LTC), or crossover claim, and/or adjust or void a paid claim. The user has the capability to enter all of the required information to submit an institutional claim, including multiple detail lines. For a paid claim, the user has the option of updating select fields and re-submitting the claim as an adjustment or to void the claim.

The Institutional Claim panel includes the following sections:

- Institutional Claim
- Diagnosis
- TPL
- Medicare Information
- Detail
- Claim Status Information
- Adjustment Information
- EOB Information

NOTE:

The Adjustment Information and EOB Information panels appear after a claim has been submitted.

Click the link to activate and display the following panels. Only one panel can be displayed at a time.

- Condition
- Payer
- Procedure
- Occurrence

Navigation Path: [Claim] – [Institutional] OR [Claim]-[click on Institutional link] OR [Claim] – [Search] - [search for institutional claims]-[select institutional claim from search results]

NOTE:

Each field which contains an asterisk represents a required field. Therefore, the claim is not considered complete until those fields have been completed with the appropriate data.

12.11 Professional

12.11.1 Professional Claim Panel Narrative

The Professional panel allows a medical provider to submit a professional or crossover claim and/or adjust or void a paid claim. The user has the capability to enter all of the required information to submit a professional claim, to include multiple detail lines. For a paid claim, the user has the option of updating select fields and re-submitting the claim as an adjustment or to void the claim.

The Professional Claim panel includes the following sections:

- Professional Claim
- Diagnosis
- TPL
- Detail
- Claim Status Information
- Adjustment Information
- EOB Information

NOTE:

The Adjustment Information and EOB Information panels appear after a claim has been submitted.

Navigation Path: [Claim] -[Professional] OR [Claim]-[click on Professional link] OR [Claim] – [Search] - [search for professional claims]-[select professional claim from search results]

NOTE:

Each field which contains an asterisk represents a required field. Therefore, the claim is not considered complete until those fields have been completed with the appropriate data.

14. Trade Files

Trading Partners can upload batch files from directories within their personal computer (PC) or Local Area Network (LAN) to Alabama Medicaid's web server for processing. Authorized users can access the Interactive Services website to perform this function or use a software program that runs on a user's PC or server that connects to the secure website.

Another function within the Interactive Services website allows users to download batch files from Alabama Medicaid's web server to directories within their PC or LAN. Authorized users can access the Interactive Services website to perform this function or use a software program that runs on a user's PC or server that connects to the secure website. The user's site sends a request using the HTTPS protocol containing parameters that include the User ID, the associated password, and the requested transaction type.

From the Trade Files link in the Main Menu toolbar, users can access the following Sub Menu options:

15. Prior Authorization

The Prior Authorization features allow users to search for or submit prior authorizations via the Interactive Services website.

From the Prior Authorization link in the Main Menu toolbar, users can access the following Sub Menu options:

- Search
- Submit
- Submit New

15.1 Prior Authorization Search

15.1.1 Prior Authorization Search Panel Narrative

The Prior Authorization panel allows users to search for prior authorizations and determine their status. The user has the capability to view the details and status of each prior authorization submitted or start a new prior authorization.

The corresponding prior authorization search results appear on the Prior Authorization panel in a list of ten prior authorizations per page. This list contains summary information about the prior authorization. The prior authorization number is hyperlinked to the prior authorization Submit panel for review. The prior authorization wizard process, used to submit a new prior authorization request, can be initiated by clicking the add button.
